SketchUp Architect - Rendering with Lumion course

Introduction
This course designed for intermediate to experienced Sketchup users. In this course we will begin by importing a sketchup model into lumion and then go over the toolbars and function of Lumion. This is a great course if you are looking at creating animations and renderings that are photo realistic and will not take long to render.

Requirements
Student should have access to SketchUp Make or SketchUp pro in order to follow this course along with a version of Lumion. This course is taught using Lumion 7.5

Instructor
This course is taught by Thomas Soltren, Thomas has over 20 years experience in the architectural field. He has built over 1,000 models using SketchUp and continues to work in the architectural design industry. He has learned methods and techniques that has allowed him to build models quickly and effectively to convey design concepts.

Course Length
There are 10 video lessons that will cover the following topics listed below.
